With more than 6,200 employees in research, teaching and administration and its unique profile, TU Dortmund University shapes prospects for the future: The cooperation between engineering and natural sciences as well as social and cultural studies promotes both technological innovations and progress in knowledge and methodology. And it is not only the more than 34,300 students who benefit from that.

At TU Dortmund University’s ZWE Sozialforschungsstelle, the position of a research fellow (PhD or early Post doc) (m/w/d) (50 %) is to be filled at the earliest possible date, limited until 31.03.2023. The duration of the contract is arranged appropriately according to the qualification goal. An increase of the part-time position through third-party funded projects might be possible. Salary payments are made in accordance with the regulations under public tariff regulations according to salary group 13 TV-L. This is a part-time position. The possibility of further scientific qualification is given and desired.

YOUR TASK:
- Participation in the development of the research field “social science innovation research”;
- Literature studies on theoretical and empirical research questions in this field;
- Collaboration on and independent development of articles for relevant scientific journals;
- Development of research projects and funding applications for third-party funded projects in this field;
- Teaching in the extent of 2 semester periods per week at TU Dortmund University.

WE OFFER:
- In addition to a substantively attractive job, you can expect a very good working environment and a very good working atmosphere with a motivated, interdisciplinary and internationally networked team.
- Diverse opportunities for personal development.
- Participation in the international scientific exchange.
- A family-friendly business culture.

YOUR PROFILE:
- You have a university degree in sociology, social sciences, economic sciences, political sciences or a degree with a similar relevant focus.
- You have good knowledge and experience in the international social scientific innovation research.
- You have already gained experience in theoretical-conceptual work and application-oriented empirical research.
- Ideally, you already have knowledge in the research field of social innovation.
- You are proficient in the methods of empirical social research.
- You write scientific texts with pleasure and confidence.
- You are looking forward to an active engagement in the scientific community.

- You are confident in using the common MS Office applications.
- Very good, demonstrable English language skills are a precondition.
- Spanish knowledge would be a plus.
- The willingness for business trips, national and international, is expected.

We explicitly note that applications of all sexes are welcome. Applications from women are favoured complying with legal regulation.

We also underline that applications of severely disabled persons are welcome.
